

ABSORBA

The Sound Solution Pre-Fabricated Acoustical Fabric Wall & Ceiling System

ABSORBA

Introduction

Creative Noise Control Pte Ltd manufactures a wide range of products designed to reduce indoor noise pollution. These products are acoustically functional and aesthetically appealing. They can be designed in any architectural or interior style.

Design

The core of the product is moulded from long strand fiberglass specially selected for its broad-band acoustic absorption. This is thermally bonded to a high density facing layer, comprising of ultra-fine fibres design to give a smooth, blemish-free surface.

Function

Sound absorptions, the primary function of ABSORBA Noise Control Panels and Baffles.
